## PROJECTS

### Portfolio Website

[Project Link](#)

- I designed and developed a responsive website to ensure optimal user experience across all screen sizes, including desktops, tablets, and mobile devices.
- The project was built using HTML, CSS, and JavaScript, allowing for a dynamic and interactive user interface.
- A portfolio website created using HTML, CSS, and JavaScript serves as a digital showcase of an individual's or a professional's work, skills, and accomplishments.

### Weather Application

[Project Link](#)

- A weather application website is built using HTML, CSS, and JavaScript.
- It utilizes external APIs to fetch real-time weather data and forecasts for specific locations.
- Users can input a city name to get weather updates.
- The website dynamically displays weather information in a user-friendly format, using visual representations and regular updates to keep the data accurate and relevant.

### Snake Game

[Project Link](#)

- The Snake Game is a classic arcade game where the player controls a snake that moves around the screen, consuming food to grow longer.
- Users use keyword(left,right,up,down) to change the direction of a snake.
- The game ends when the snake collides with itself or with the boundaries of the playing area.
